Reports Screen

1. Reports based on your most frequently missed words:

Selecting this report will provide a list to you of words you miss the most!
These are words you have submitted a quiz answer for at least once, and the number of times you got it wrong is more than the number of times you answered correctly.

2. Reports based on your well-known words:

Selecting this report will provide a list to you of words you know well!
These are words that you have submitted a quiz answer for at least once, and the number of times you got it right is more than the number of times you answered incorrectly.

3. Reports based on your never seen words:

These are words you have no record of seeing in the random word generator, quizzes, or flashcards! Looking at this list can help you to peek at words that have not come up yet! Keep playing, and this list will get smaller!

When you have seen all 1000 words and this list is empty, you will be able to reset your progress to return all words to being never seen and never answered.

WARNING: Pressing this button will reset your progress to that of a new player who has answered and seen 0 questions. (see image item 2 below for reference).
